(54) Title: DISPLAY PANEL

(57) Abstract: The invention relates to a display panel (1) formed on a substrate (5) and comprising a plurality of display pixels (3) with at least one light emissive layer (9) and at least one electrode layer (10) or cathode deposited on or over said light emissive layer (9). The display panel (1) further comprises electrically conductive structures (7) shunting said electrode layer (10). Preferably barrier structures separating the display pixels (3) are used as the electrically conductive structures (7). The invention allows the cathode (10) to combine appropriate transparency with a reasonably low electrical resistivity.
